

Avigilon™ Control Center 5 Release Notes for Integration with Access Control Manager 5.8

Access Control Manager Integration 5.8.4.13 - Released November 2, 2017

Release Summary

The Avigilon system integration allows you to achieve a unified security through the use of the Alarm Gateway component and the VidProxy component. The Alarm Gateway component allows alarms triggered in the Avigilon Access Control Manager to be monitored and recorded through the Avigilon Control Center software. The VidProxy component allows you to see video and receive events from the Control Center system in the Access Control Manager application.

New Features & Issues Fixed

- Added support for ACM 5.10.6

Supported versions of ACC

- ACC 5.8 and later

Supported versions for Access Control Manager:

- ACM 5.8 and later

Known limitations

- This integration is backwards compatible with ACM 5.8+ and ACC 5.8+
- ACM 5.10.6 and ACC 6.6 are only compatible with this integration. If you upgrade to ACM 5.10.6 or ACC 6.6, you will need to use this integration.
