

Avigilon Access Control Manager with Schlage handheld device

Avigilon™ Access Control Manager (ACM) wireless lock solution utilizes Allegion's Schlage Handheld Device (HHD). The HHD consolidates and simplifies the initial configuration of your wireless lock solution.

WIRELESS LOCKS

The ACM wireless lock solution provides an easy way to manage people, audits, locks and other network panel interface devices for simple access control. The Schlage Utility Software (SUS) on the HHD is used to initialize, configure and test product operation.

The intuitive screen layout of the HHD provides easy navigation during the initial setup of the wireless locks solution. SUS can configure other networked electronic devices (including PIM) and provide firmware updates to the lock devices as desired.

The HHD connects to Schlage AD-400 Series electronic locks and accessories via a USB interface and utilizes Microsoft Active Synchronizer to communicate with your PC via the USB port.

KEY FEATURES

Handheld Device with Schlage Utility Software installed

Touch screen operation

Lock and accessories initialized with SUS

Specifications

HHD	Display	3.5-inch display
	Screen	Touch screen with backlit keypad
	Operating system	Windows Mobile 6.5
	Memory	128 MB RAM / 256 MB ROM
	Battery	Rechargeable Li-ion
	Dimensions (H x W x D)	5.1" X 2.8" X 0.65" (13.0 cm x 7.2 cm x 1.7 cm)
	Weight	0.42 lbs (190 g)
	Drop specification	Five foot (1.2 m) drop to steel surface, two drops per six sides
