

Access Control Manager™ Enterprise Plus Getting Started Guide

This package includes:

1. The Access Control Manager Enterprise Plus appliance.

2. Two power cords.
3. Front bezel.
4. Rails package.
5. Cable management kit.

1. Plug In the Appliance

Plug the included power cords into the back of the appliance and into a surge protector or UPS.

Connect Power Cords

2. Connect PC to Appliance

Connect a network cable directly from a DHCP enabled port on your configuring PC to RJ-45 Port Gb2 on the appliance.

Do not connect the PC or appliance to the local network at this point.

iDRAC Management Console port

Connect to Port Gb2

3. Open Web Browser

Open the web browser on the connected PC and type this IP address: 169.254.1.250.

If you get a message indicating a connection or security error, refer to *Access Control Manager Enterprise Troubleshooting available at avigilon.com*.

4. Login to the Application

When the log in screen appears, enter the default login name and password as “admin” then click **Sign in**. (It is recommended to change the default user name and password for the System Administrator.)

The Access Control Manager application main menu appears.

5. Edit Hostname

The default hostname for each appliance is ACM. If you need to set a specific hostname for the appliance, do so at this point before the appliance is connected to the network.

1. From the top right corner, click > **Appliance** to open the Appliance: Edit page.
2. On the Appliance tab, enter a new Host Name.
3. Click the **Save** button.

The appliance automatically restarts.

6. Accept EULA

After you log in, you must accept the end user license agreement (EULA).

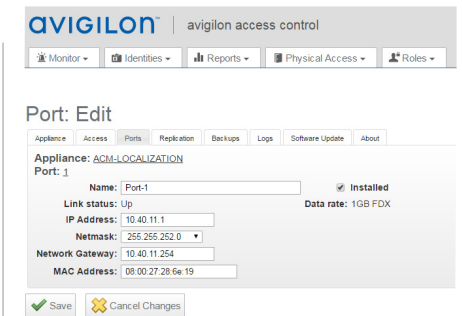

1. Click the link below **End user license must be accepted. Accept EULA to stay in compliance**.
2. Review the EULA then select the **I accept the terms of the License Agreement** check box.
3. Click **Submit**.

7. Configure Port Settings

From the Access Control Manager application main menu, perform these tasks:

1. From the top right corner, click > **Appliance**.
2. Click the **Ports** tab then select Port-1.
3. From the Ethernet Configure page, enter the required values. These include: Name, IP Address, Netmask, and Network Gateway.

Consult your IT manager for the IP Address, Netmask, and Network Gateway values appropriate to your installation.

4. Click the **Save** button.
5. Manually restart the appliance.

8. Connect Appliance to Network

1. After the appliance restarts, disconnect the appliance from your configuring PC.
2. Connect the appliance to the system network through Port Gb1 on the appliance.
3. Open a web browser from a network connected device and log in to the Access Control Manager application.

For more information about configuring your system, see the Help files provided with the Access Control Manager application.
